#### **Primary Substance of Use**

At admission clients also identify a “primary drug” of use that is the substance for which the client is seeking treatment. Table 1 compares the proportional distribution of primary drugs in Massachusetts with that for the Second Suffolk Representative District.

<b>Table 1</b>					
<b>Primary Drug by District and State FY 2003</b>					
	Alcohol	Heroin	Marijuana	Cocaine	Crack
District	36%	47%	4%	3%	5%
State	43%	38%	6%	4%	4%

#### **Substances Used in Past Year**

Upon entering treatment, each client is asked to report ALL substances used in the past year (12 months) prior to admission. Admissions frequently report using more than one substance within the year. The use of more than one psychoactive substance, such as alcohol and marijuana, is referred to as ‘polydrug’ or ‘polysubstance’ use.

Table 2 shows ALL substances which clients reported using in the year prior to admission, as well as the prevalence of injection drug (or IDU's), individuals who use a needle to ingest cocaine, crack, heroin or another drug to get high.
